- **Communication:** English(Intermediate).

### PROJECTS

---

**Digital-Notes** — Github — Live

August 2023 - Completed

- Developed a full-stack note-keeping application using the MERN stack (MongoDB, Express.js, React, Node.js).
- Implemented CRUD operations allowing users to create, read, update, and delete notes efficiently.Maintained the status of all notes, providing users with real-time updates and status tracking.
- Use of context api for state management to avoid prop drilling .
- Secured user accounts with authentication using JWT (JSON Web Tokens), ensuring data privacy and security.
- Configured a responsive layout to maintain top performance across all devices and screen resolutions.

**Homyz** — Github —Live

November-2023 Completed

- React-based static web application to present detailed property information with an engaging user experience.
- Developed reusable and maintainable components to facilitate updates and scalability.
- Streamlined user flow with clear, accessible menus and controls for efficient property viewing.
- Implemented a flexible layout to guarantee efficient performance on a range of devices and screen dimensions.

**Fitclub** — Github— Live

December 2023-Completed

- Developed a static website providing comprehensive information on exercise routines, diet plans, and service plans using reactjs.
- Created a responsive layout to ensure optimal performance on various devices and screen sizes.
- Focused on front-end development to deliver a seamless and interactive user experience.

### Achievements

---

#### Certificates:

- Reactjs : <https://drive.google.com/file/d/13w1XCEBOnHo3gntnAOJ-78qUDEFXSQ3U/view>
- Virtual Experience: <https://drive.google.com/file/d/13uTN0SJ5AczmQPecFJXHfCZLxkBTXRpP/view>

#### DSA Solved Problems:500+
